Introduction

“Founded in 2005 by Snehal Parmar, Silicon Technology is a trusted IT solutions provider, recognized for industry partnerships with Intel, IBM, ASUS, Quick Heal, Lenovo, Dell, HP, FortiNet, LG, Qnap, Artis, Gigabyte delivering reliable systems, servers, networking, and security solutions with over 20 years of expertise.”

About us

Founded by Mr. Snehal Parmar in 2005, Silicon Technology is a trusted name in the IT solutions and services industry. With two decades of expertise, we specialize in providing end-to-end technology support for businesses, professionals, and individuals. Our core strength lies in designing, implementing, and managing IT infrastructure that is secure, reliable, and scalable.

At Silicon Technology, we understand that technology is the backbone of every successful business in today's digital era. Our mission is to empower organizations by delivering cost-effective, customized, and future-ready IT solutions that enhance productivity and simplify operations.

Qualification and Certification

- Master's in Computer Applications (MCA)
- Microsoft Certified System Engineer (MCSE)
- Cisco Certified Network Associate (CCNA)

Snehal Parmar
B.Com, MCA, MCSE, CCNA

Mr. Snehal Parmar, the visionary behind Silicon Technology, brings 20+ years of rich experience in the IT field. His strong educational background and professional certifications ensure that every project undertaken by the company meets global standards.

Our Services

Silicon Technology offers a wide range of IT services, including:

Windows Server Solutions – Complete Setup, configuration, management, and administration.

Network Storage (NAS) – Reliable and scalable storage solutions.

Firewall & Security Solutions – Protecting businesses from cyber threats.

Remote Desktop & Virtualization – Secure and seamless access for businesses.

Endpoint Security & Support – Protecting businesses from viruses, malware.

IT Consulting & Support – Customized solutions for small and medium businesses.

Printers & Peripherals – Installation and maintenance.

Computer Systems & Laptops – Sales, service, and support.

Server Solitions

Key Benefits of Windows Server

1. **Centralized Management** – Manage all users, devices, files, and applications from one place.
2. **Active Directory (AD)** – Provides secure authentication, user access control, and group policy management.
3. **File & Print Services** – Easily share files and printers across the network.
4. **Remote Desktop Services (RDS)** – Employees can securely access applications and desktops from anywhere.
5. **Data Security** – Built-in security features like Windows Defender, and advanced firewalls.
6. **Scalability** – Supports small offices to large enterprise environments as your business grows.
7. **Backup & Disaster Recovery** – Provides system backup, restore, and business continuity solutions.
8. **Integration with Microsoft 365** – Hybrid cloud setup for email, storage, and collaboration.
9. **High Performance & Reliability** – Stable, secure, and optimized for business-critical workloads.

Firewall Solitions

Key Benefits of Firewall

1. **Strong Network Security** - Protects against viruses, malware, ransomware, and intrusions.
2. **Unified Threat Management (UTM)** - All-in-one protection: Firewall, VPN, Web filtering, IPS/IDS, Antivirus, and Application Control.
3. **High-Performance Firewall** -Delivers fast throughput with low latency, suitable for small offices to large enterprises.
4. **Secure Remote Access (VPN)** - Provides SSL VPN and IPsec VPN so employees can securely connect from home or remote locations.
5. **Web & Application Filtering** - Blocks harmful websites, phishing, and inappropriate content. Controls bandwidth usage by blocking or limiting apps like YouTube, social media, torrents, etc.
6. **Advanced Threat Protection** - Stops zero-day attacks using AI-powered detection and sandboxing.
7. **Scalability** - Suitable for small businesses, data centers, or cloud environments. Can be expanded as your network grows.
8. **Centralized Management** - Easy monitoring and reporting
9. **Cost-Effective** - Reduces the need for multiple separate devices (antivirus, VPN, web filter) since it's all in one.
10. **Regulatory Compliance** - Helps meet security requirements for industries (like finance, healthcare, government).

Network Storage Device

Key Benefits of a Network Storage Device

1. **Centralized Storage** - All files, documents, and data are stored in one place. Easy access for all users on the same network.
2. **Data Sharing & Collaboration** - Multiple users can access and work on files simultaneously. Perfect for small offices and teams.
3. **Data Security & Backup** - Protects against data loss a RAID configurations. Scheduled backups to prevent accidental file deletion or hardware failure.
4. **Remote Access** - Access files securely from anywhere using the internet (via VPN or NAS apps).
5. **Cost-Effective** - Saves money compared to cloud storage subscriptions for many users. One-time investment, expandable as needed.
6. **Scalability** - Easily add more storage drives when data grows.
7. **File Versioning & Recovery**- Keeps multiple versions of files, making it easy to restore older copies.
8. **Improved Performance** - Frees up PCs and servers by offloading file storage to NAS.

1. Founded Silicon Technology by Mr. Snehal Parmar (MCSE, CCNA, MCA) with a vision to provide reliable IT solutions and services
